

Strategic Energy Management PLAN

Establish a roadmap for success.

Every step toward lower energy use is a step in the right direction. Our team is ready to help you plan your project roadmap from establishing realistic goals to implementing a detailed plan of how to set, reach and surpass your energy reduction targets—all while keeping it in budget.

Let's get to work.

With your strategic energy management (SEM) plan in hand, it's time to start making a difference. We're ready to partner with your team to develop an actionable plan to reduce energy usage with a thorough understanding of your organization's priorities and goals.

1 Review

Our team can help prioritize your energy initiatives with the recommended budget for projects such as maintenance and management on fleet vehicles, equipment upgrades and replacements, and other efficiency improvements.

2 Plan

Once all of the tactical work has been identified, we'll work together to source the trade allies and specialists needed to implement your project. A detailed timeline will also be created to guide all your improvements from start to finish.

3 Budget

Together, we'll walk key stakeholders through the process of aligning the cost of lowering your energy use with your bottom line. We'll work with your teams to forecast and plan everything needed to achieve your efficiency goals.

4 Activate

Prepare to put your personalized plan in motion with all key stakeholders to continue the momentum of your energy reduction initiatives and keep your environmentally sustainable missions on track.

Key areas of focus

Behavior

Saving energy often starts with simple behavioral changes to use less each day.

Equipment

Upgrading outdated equipment to certified, energy-efficient models ensures your savings last.

CLEAResult ATLAS™

Our all-in-one SEM solution

- ✔ Customer-centric UI
- ✔ Customer service and support
